INSPECTION

Quality is the most important. We carry out product inspection in the incoming materials, during the mass production and after the mass production to ensure product quality.

MASS PRODUCTION

We strictly follow the production process for the mass production. The product is produced, assembled, tested and packaged by our professional workers for each process.

AGING TEST

To ensure the quality of our products to customers, we perform aging tests on each product before packaging to ensure that the products are in good condition before they are packaged into storage.
